- A background in End-User Computing
- Completed Workspace ONE UEM Deploy and Manage course

Technical requirements

- Bring a full-size laptop.
- A secondary device is recommended for reading and lab materials, which are only delivered electronically.
- Please ensure you have the US keyboard mapping added to your devices.

Workspace ONE® UEM: Administration and Operations

Course modules

1 Course introduction

- Introductions and course logistics
- Course objectives

2 Workspace ONE foundations

- Navigating and customizing the console
- Workspace ONE UEM console foundations
- Workspace ONE Hub Services
- Workspace ONE UEM accounts

3 Workspace ONE architecture

- Workspace ONE & modern SaaS architecture
- Workspace ONE UEM architecture
- Additional Workspace ONE components
- Workspace ONE example use cases

4 Directory services and identity management

- Identity management – Direct integration vs. Omnisia Identity service
- Direct integration Directory services UEM
- Identity management in Omnisia Access
- Identity management with Omnisia Identity service
- Enterprise Federation for Administrator Access in Omnisia Connect
- Integrating Omnisia Access with Workspace ONE UEM for Hub services and secure authentication

5 Access integration, policies and conditional access

- Omnisia Access overview
- Authentication methods in Access
- Federate resources for SSO
- Access policies and conditional access

6 Application management

- Applications overview
- Public applications
- Internal applications
- Purchased applications
- Software distribution management
- Workspace ONE SDK

7 Profiles and policies – basics and beyond

- Describe the benefits of using profiles
- Identify the various profile types
- Identify platform-specific profile payloads
- Explain how to create and deploy profiles in the workspace ONE UEM console

8 Scripting and automation with Freestyle Orchestrator

- Introduction to Freestyle Orchestrator
- Components of a Freestyle workflow in Workspace ONE UEM
- Workflow creation process in Workspace ONE UEM
- Troubleshooting a workflow in Workspace ONE UEM
- Components of a Freestyle workflow in Omnisia Intelligence

Workspace ONE® UEM: Administration and Operations

Course modules (cont.)

9 Modern management for Windows – Part 1

- Getting started with Windows management
- Provisioning, enrolling, and onboarding
- Policy configuration

10 Modern management for Windows – Part 2

- Windows updates
- Windows apps
- Analytics and troubleshooting

11 Apple Device Management – Part 1

- Apple management in Workspace ONE UEM
- Introduction to Apple services
- Integrating Apple Business Manager with Workspace ONE UEM
- Automated Device Enrollment
- App and content deployment with VPP
- Profiles for Apple Devices
- Declarative Device Management
- Creating a profile in Workspace ONE

12 Apple Device Management – Part 2

- Scripts and sensors with the Intelligent Hub
- Intelligent Hub hubcli
- Introduction to macOS and iOS updates
- OS update management in Workspace ONE UEM
- Device Updates dashboard
- Software Update Enforcement
- OS updates with Intelligent Hub hubcli

13 Android Enterprise deep dive

- Android Device Management Modes
- Android Enterprise (Custom DPC & AMAPI)
- Profile and device compliance
- Productivity Application & Application Management
- Operating System update, Freestyle Orchestrator and troubleshooting

14 Omnisia Intelligence

- What is Omnisia Intelligence and terminology overview
- Easiest point of entry – the Marketplace
- Customizing the environment - Dashboards & Data Explorer deep dive
- Omnisia Horizon Operations overview – virtual apps and desktops
- Omnisia Intelligence Experience Management deep dive
- Keeping an eye on safety – Workspace Security
- Working with others – Integrations
- Finishing the puzzle – overview recap

15 Security, Compliance, and Zero Trust

- Introduction to Zero Trust with Omnisia
- Compliance Policies
- Mobile Threat Defense overview
- Tunnel for Secure Access to resources
- Zero Trust Compliance integrations

Workspace ONE® UEM: Administration and Operations

Course modules (cont.)

16 Workspace ONE UEM API

- Workspace ONE API Overview
- Using the Workspace ONE UEM API
- Using the Omnisca Access API
- Using the Omnisca Intelligence API

17 Troubleshooting and diagnostics – Part 1

- General troubleshooting guidance
- Core and integration components topology
- Workspace ONE UEM log files
- AirWatch Cloud Connector
- Directory Services integration
- Certificate Authority integration
- Omnisca Access and Hub Services integration

18 Troubleshooting and diagnostics – Part 2

- Endpoint topology overview
- Tools and resources for troubleshooting
- Workspace ONE Assist
- Troubleshooting common issues
